

The RSTD-06.... Beehive's Most Versatile and Reliable Separator.

The Most Versatile Separator In The World.

If you want to learn the real meaning of versatility in a separator, read the RSTD-06's resume. For more than a decade, this machine has performed reliably day in and day out, in numerous installation sites, in more than 50 different countries. The RSTD-06 is renowned for its versatility, effortlessly demonstrated in its ability to handle the world's broadest spectrum of raw products which frequently includes input material that is too difficult to process by competitive machines. Larger chicken and turkey frames are easily converted into exquisite, coarse textures which offer unlimited further processing alternatives.

- ★ A Proven Separator--in Constant Operation Since 1971
- ★ More Than 150 Installations In Food Processing Plants Worldwide
- ★ Extremely Rugged & Durable Made Exclusively of Stainless Steel

- ★ Produces the Highest Quality Textures Available in the World
- ★ Throughput Speeds Up To 6,000 lbs. Per Hour
- ★ Backed by Weiler-Beehive's Guarantee of Satisfaction

A Proven Track Record of Reliability.

Beehive can provide you with testimonials from satisfied customers who depend on the RSTD-06 for consistent performance. This is the easiest, risk-free separator in the world to buy. Its track record of outstanding reliability is unmatched--and so are the textures which come out of its chambers. With simple, precise controls--the RSTD-06 generates textures which are so coarse, so full of rich fibers with extraordinary "bite"--that if your company is looking for the best textures in the world--look no further.

Beehive's Most Durable Separator.

All Beehive machines are rugged. All are made of stainless steel. However, the RSTD-06 is our most durable separator. From the thicker gauge steel used in its chambers to its powerful twin screws and augers--every inch of this machine is carefully manufactured to readily handle the world's most challenging meat processing assignments. Depending on the raw product, the RSTD-06 can process up to 6,000 lbs. of throughput per hour.

Enjoy total and simple control over **QUALITY TEXTURES**

ENJOY TEXTURES WITH "REAL BITE"

THE RSTD-06 PRODUCES COARSE, FIBROUS TEXTURES IDEAL FOR FURTHER PROCESSING

RSTD-06 SPECIFICATIONS

- USDA Approved Machine
- Total Horsepower: 55 (41 Kw)
- Auger Horsepower: 40
- Auger speed (constant): 195 RPM
- Pump speed (variable): 11 to 70 RPM
- Pump horsepower: 15
- Hopper capacity: 9 cu. ft. (255 l.)
- Input capacity (varies with product): 3,000 lbs. (1361 kg.) to 6,000 lbs. (2722 kg.) per hour
- Feedscrew: Twin
- Drive Assembly: Direct Drive
- Machine Dimensions: 85.3" (216.7 cm.) L x 55.6" (141.2 cm.) W x 71.3" (181.1 cm.) H
- Crated Dimensions: 80" (203 cm.) L x 60" (152 cm.) W x 78" (198 cm.) H
- Machine Weight (uncrated): 3,000 lbs. (1364 kg.)
- Estimated Crated Weight: 4,500 lbs. (2045 kg.)

Input A Variety of Raw Products, at throughput speeds up to 6,000 lbs. per hour...

And Enjoy the Benefits of the World's Most Profitable Further Processing Applications!

Beehive's RSTD-06 Separator offers you the world's best track record for separating the broadest spectrum of raw products while obtaining the world's best textures.
